

Accounting 101

Financial accounting from the ground up.

Delivery	In person, virtual or hybrid
Cohort size	2 to any size
Duration	1 day (modular)
Level	Foundational
Pricing	Available on enquiry

Overview

A practical grounding in financial accounting for anyone who needs to read, interpret and trust a set of accounts. We build the three statements from first principles and show how they connect, using real filings rather than textbook abstractions.

Who it's for: New analysts, non-finance professionals, and investment teams who want to read accounts with confidence.

What you'll cover

- The income statement, balance sheet and cash flow statement, and how they link
- Accruals, the matching principle and the mechanics of double entry
- Revenue recognition and working capital
- Depreciation, amortisation and capital expenditure
- Debt, equity and the financing section
- Reading and adjusting real company filings
- Common red flags and the basics of earnings quality

Learning outcomes

- Read and interpret a full set of financial statements and explain how they interconnect
- Trace a transaction through the income statement, balance sheet and cash flow statement
- Identify the accounting policies and adjustments that materially affect analysis
- Establish the core technical foundation required for financial modelling and valuation

Every course is tailored to the counterpart, cohort and desk. To discuss a programme or request pricing, contact us at surojit.chakraverti@3wavecap.com.
