

Venture Capital

Cap tables, term sheets and fund economics.

Delivery	In person, virtual or hybrid
Cohort size	2 to any size
Duration	1 to 2 days (modular)
Level	Foundational to Intermediate
Pricing	Available on enquiry

Overview

The mechanics of early-stage investing that every VC professional and founder-facing investor needs. We cover cap tables, term sheets, valuation and the fund economics that sit behind the cheque.

Who it's for: VC professionals, angels, and corporate venture teams.

What you'll cover

- Cap tables: ownership, option pools and dilution
- Pre-money and post-money valuation
- Term sheets: economics and control
- Convertible notes, SAFEs and priced rounds
- Fund economics: waterfalls, carry and the J-curve
- Modelling ownership and returns across rounds

Learning outcomes

- Build and interpret a cap table across multiple financing rounds
- Calculate pre- and post-money valuation, dilution and ownership
- Interpret the economic and control terms in a term sheet
- Explain fund economics, including waterfalls, carry and the J-curve

Every course is tailored to the counterpart, cohort and desk. To discuss a programme or request pricing, contact us at surojit.chakraverti@3wavecap.com.
